Tool to search on the Indeed job board for France

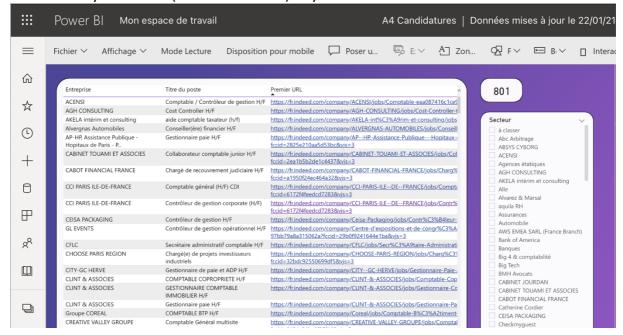

- 1. Install Jupyter Lab on your machine: https://jupyterlab.readthedocs.io/en/stable/getting_started/installation.html
- 2. Run Jupyter Lab
- 3. Run the "IndeedFrance" notebook

4. Download CSV file and upload it to a cloud (OneDrive for Business in my case)

5. Connect your BI tool (such as Power BI) to your cloud.

I recommend using the company column to mix it with a database of companies classified by sectors, your favorites companies or your dream job in order to directly identify the jobs you will apply first.

6. Reprocess the Notebook every 3 days to have an update on job posted (do not forget to copy/paste again the CSV file in the cloud).
